

Together is a road traveled by the brave. George Betts

LOWER KING STREET STREETScape NOTICE

Call Su - 720-3886

NOVEMBER 7, 2008

Call Bret - 860-3686

www.charlestoncity.info - Click on Economic Development Department - Click on "Streetscape" for weekly flyer

- ★ Forty percent of the laterals repairs and/or linings have been completed, and this includes the laterals in the Fulton Lane to Clifford Street block and in front of Tellis Pharmacy. Laterals near Berlin's parking lot are scheduled for repair some time next week. **Sewer lateral crews will be working wherever they can find laterals to work on next week. Please be prepared.**
- ★ The granite curb has been installed between Market Street and 204 King Street. The new electrical conduit is placed; however, electrical services will be returning to pull the wire at a later date. The swapping out of old for new water meters began yesterday and will continue next week. Please be advised that there will be brief water interruptions. Bret will advise. Grading of the sub-base for the bluestone is past the driveway between 208 & 212 King Street with this work continuing into next week.
- ★ Curb and sidewalk demolition is complete between Fulton Lane and Clifford Street. Water services work is on-going by Anson Construction. Please be prepared for brief water shut-offs. Wildwood is working on the hardscaping. And, a new vendor, Ertel, has arrived to move the gas line. Ertel is an independent non-Streetscape vendor working for SCE&G. They are not under the control of the prime contractor; however, staff has talked with SCE&G about the challenges of working vehicles and equipment on site and working not to block storefronts.. Ertel will be working as quickly as possible to finish the job and leave the area.
- ★ It is tough going at the intersection of King and Queen Streets. The electrical conduit is through the intersection. However, the crew has encountered existing utilities and old storm tunnels. Digging with shovels is often necessary to open the space for the new water main.
- ★ The 2-way traffic in the Queen Street block continues with a.m. to p.m. police assistance.

Halloween
fun on
Lower King!
Thanks,
Jackson
